A UNIT OF MAHENDRA EDUCATIONAL TRUST

ICT TOOLS & SUPPORT

TEACHERS USE ICT- ENABLED TOOLS INCLUDING ONLINE RESOURCES

ICT Smart Class room is an innovative teaching learning tools which brings explanatory content into visually attractive content by integrating learning technology such as computers with Internet connectivity, learning management system (LMS), audio & video systems, and LCD projector with whiteboard. Collaborative learning environment, simple, friendly and non-intimidating classroom technology inspires the presenters who rely on improvisation, spontaneity and audience participation.

This helps the faculty members to effectively deliver the subjects with graphical components (charts, graphs, etc), animations and simulations etc. This tool can make the faculty members to easily implement the method of pedagogy. Students can have a learning environment which supports collaborative learning through simulation and live interaction. This facility increases the learning interest of the students in studies. All the computer systems have internet connection and Wi-Fi connection facilities.

Benefits of Smart Class Rooms

- Access Internet & Intranet Resources at anytime, anywhere in college premises
- Ease of understanding by slow learners
- Makes learning enjoyable with friendly environment to students
- Improves the academic performance

Innovative Teaching Learning Methods

- Lecture Capturing System (LCS)
- Digital Smart Interactive board based Lecture
- Anna University EDUSAT Live Programme
- IIT-Bombay Spoken Tutorial
- NPTEL Local Chapter
- SWAYAM
- Webinar organized by Infosys Campus Connect Programme
- Activity based Learning

IT Department: Faculties Sample Video Lectures on Technical Topics

1. Name of the faculty: Mrs. M.SANTHY

Department and designation of the faculty: IT & Assistant Professor

Subject:CS3271

Subject Name : Data Structures and Algorithms

Topic of the video: AVL Tree

Regulation : 2021

Length of the video: 13 minutes

Link of the video: https://youtu.be/7vKYwAeH_8w

AVL TREES

Original AVL Tree

After inserting value 15

Height remains unchanged but the balance factor of the root node has changed

Minnampalli, SALEM-636 106

Sample NPTEL VIDEO CLASSES

Pseudo-Code

- A mixture of natural language and high-level programming concepts that describes the main ideas behind a generic implementation of a data structure or algorithm.
- Eg: **Algorithm** arrayMax(A, n):
Input: An array A storing n integers.
Output: The maximum element in A.
currentMax ← A[0]
for i ← 1 to n-1 do
 if currentMax < A[i] then currentMax ← A[i]
then when the loop terminates we would just
 return current max.
